GERMANY IN THE WORLD AND IN THE EU

2017, sources: Eurostat and FAO

In 2017, Germany was the EU's 7th largest producer of fishery products and the 10th largest for aquaculture products.

(1.000 tonnes)	World	EU-28	Germany	% world	% EU-28
Catches	93.204	5.253	229	0,25%	4,36%
Aquaculture	111.966	1.372	34	0,03%	2,48%
Total	205.170	6.625	263	0,13%	3,97%

AQUACULTURE

Source: EUMOFA, based on Eurostat, FAO and DESTATIS data

Aquaculture consists in the farming of aquatic (freshwater or saltwater) organisms, such as fish, molluscs, crustaceans and aquatic plants. Aquaculture data are reported in live weight equivalent and value.

In 2017, 53% of German production occurred in freshwater and 47% in marine waters.

Total production

Main commercial species farmed and % of total

(2017, million euros and 1.000 tonnes)

Species	Value (million euros)	% of total	Volume (1,000 tonnes)	% of total
TROUT	38,3	39%	16,9	50%
MUSSEL MYTILUS SPP.	23,7	24%	9,1	27%
EEL	15,4	16%	4,7	14%
CARP	11,4	11%	1,2	4%
FRESHWATER CATFISH	3,1	7%	1,2	4%
OTHERS	7,3	3%	0,7	1%

PRODUCER ORGANISATIONS

2019, source: DG MARE, [link](#)

In Germany, **12 producer organisations (POs)** and **1 association of POs** are formally recognized. Their role is to contribute to the achievement of the objectives of the Common Fisheries Policy (CFP) and of the Common organisation of the markets (CMO) through the collective management of their members' activities.

All 12 POs and the association of POs operate in the fishery sector; 1 of the 12 PO is involved in both fishery and aquaculture.

FIRST SALES

2017, source: EUMOFA

First sales concern the fish that is sold or registered at an auction center or to registered buyers or to producer organizations (PO). First sales may differ from landings since the former do not cover fish that is landed by vessels owned by processing companies or direct sales to processors.

In 2017, total first sales in German places of sale amounted to 86.435 tonnes and 114 million euros. The top-3 places of sale covered 85% and 57% of total first sales, respectively in volume and value terms.

Top-3 places of sale	Volume (tonnes)	Value (million euros)	Top-3 main commercial species (in value)
Bremerhaven	21.403	28	Greenland halibut, cod, herring
Cuxhaven	3.402	19	Shrimp <i>Crangon</i> spp., cod, Greenland halibut
Neu Mukran	48.834	19	Herring, cod, sprat (=brisling)

WHOLESALE

Wholesale is an intermediary stage in the distribution channel that buys in bulk and sells to resellers (e.g. retailers) rather than to consumers. In Germany, auctions have lost their importance, and fishery and aquaculture products are mostly sold directly to the wholesale trade, filleting wholesalers (in fishing harbours) and processors, or processed and sold by fishermen's cooperative trade and filleting units. In 2016, 445 fish wholesalers were active, with a turnover of 5 billion euros (source: Fischinformationszentrum).

PROCESSING

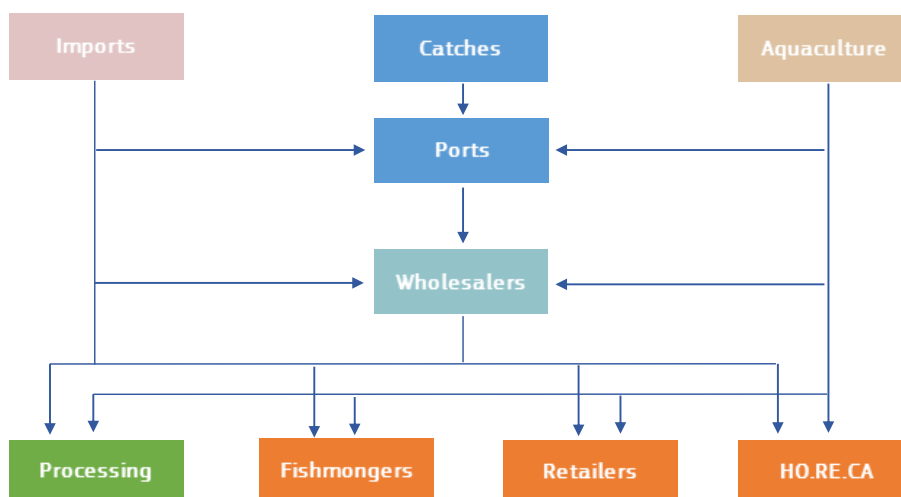

According to Eurostat-SBS, 7.246 persons were employed in the German fish processing industry in 2017. The sector recorded a value added of 392,6 million euros, covering only 1% of the value added of total manufacture of food products.

In 2018, the main products sold were “Fish fillets in batter or breadcrumbs incl. fish fingers (excl. prepared meals and dishes)” and “Prepared or preserved herrings, whole or in pieces (excl. minced products and prepared meals and dishes)” (source: Eurostat-PRODCOM).

CONSUMPTION

In 2017, apparent consumption was estimated at 13,4 kg per capita, a 5% decrease compared with 2016. The most consumed species were Alaska pollock, salmon, skipjack tuna and herring (source: EUMOFA).

Germany is one of the few countries where regular consumers, namely those who eat fishery and aquaculture products at least once a month, are mainly young people belonging to the age groups 15-24 and 25-39. In particular, regular consumers cover 68% of the total of the first category, which is slightly higher than at EU level (67%). Germans prefer frozen products; loose fish is more rarely consumed (54%) than at EU level (68%) (source: EUMOFA, "EU consumer habits regarding fishery and aquaculture products", 2017).

THE COUNTRY IN EUMOFA

LANDINGS

Volumes and values are collected from Eurostat – Fishery.

They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

FIRST SALES

Volumes and values are collected from the Federal Office for Food and Agriculture (BLE) on a weekly and monthly basis.

Weekly data are monitored for a selection of 15 main commercial species and 10 places of sale (click [here](#) for the full list). Monthly data cover all species sold in German places of sale.

Both weekly and monthly data are accessible through simple and advanced tables, as well as through the bulk download facility. As for monthly first sales, data at disaggregated level are also accessible, through a dedicated advanced table and the bulk download facility.

IMPORT - EXPORT

Volumes and values are collected from Eurostat – COMEXT. Data concern trade flows of all fisheries and aquaculture products as recorded by national customs.

They are available on a monthly and yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

AQUACULTURE

Volumes and values are collected from Eurostat – Fishery and integrated with FAO and DESTATIS data.

They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

WHOLESALE

No data available

PROCESSING

Data are collected from Eurostat – PRODCOM. They concern ex-farm quantities and values of fisheries and aquaculture products sold in the country after being transformed from raw material into final products.

They are available on a yearly basis and accessible through simple tables, as well as through the bulk download facility.

CONSUMPTION

Volumes and values of household consumption of fresh fisheries and aquaculture products are collected from Europanel based on panel reporting. Data are monitored for 10 main commercial species + the item “Others”, aggregating all other species (click [here](#) for the full list).

Data are available on a monthly and yearly basis and accessible through simple tables and the bulk download facility. Moreover, average weekly prices are accessible through simple and advanced tables, and through the bulk download facility.
