SLOVAKIA IN THE WORLD AND IN THE EU

2019, sources: Eurostat and FAO

As a landlocked country, Slovakia has a limited fishery production; it is also a minor EU-28 (i.e. UK included) producer of farmed products.

AQUACULTURE

Source: EUMOFA, based on Eurostat data.

Aquaculture consists in the farming of aquatic (freshwater or saltwater) organisms, such as fish, molluscs, crustaceans and aquatic plants. Aquaculture data are reported in live weight equivalent and value. With no direct access to the sea, aquaculture activity in Slovakia is limited to freshwater farming. The following main production methods were used in 2019:

- 38% of production: in tanks and raceways;
- 33% of production: in ponds;
- 29% was farmed using other methods for which no detail is available.

CONSUMPTION

In 2019, apparent consumption was estimated at 9,69 kg per capita, a 4% increase compared with 2018. Alaska pollock was by far the most consumed species (source: EUMOFA).

Slovakia is one of the few countries where regular consumers, namely those who eat fishery and aquaculture products at least once a month, are mainly young people belonging to the age group 15-24. However, in this category, regular consumers cover 56% of the total, which is lower than at EU level (67%, UK included). Slovaks mainly consume tinned products; loose fish (37%) is far less frequently consumed than at EU level (68%, UK included) (source: EUMOFA, "EU consumer habits regarding fishery and aquaculture products", 2017).
