## SLOVENIA IN THE WORLD AND IN THE EU

2020, sources: Eurostat and FAO

Slovenia is a minor EU-27 producer of fishery and aquaculture products.

(1.000 tonnes)	World	EU-27	Slovenia	% world	% EU-27
Catches	91.260	3.869	0,3	0,0003%	0,01%

## LANDINGS

Source: EUMOFA, based on Eurostat data.

Landings comprise the initial unloading of any fisheries products from on board a fishing vessel in a given Member State. They include aquatic plants and species not destined for human consumption. Landings are recorded in net weight and value, and concern landings made by vessels from EU Member States, Iceland, Norway and the UK.

In 2020, landings in Slovenia only include fresh whole/gutted products destined for human consumption.

There are 3 fishing ports registered in the country (source: EU Master Data Register, 13 June 2022).

**Total landings.** Values are deflated by using the GDP deflator (base=2015)

### Main commercial species landed and % of total

2020, 1.000 euros (nominal value) and tonnes

Species	Value (1,000 euros)	% of total	Volume (1,000 tonnes)	% of total
SQUID	0,16	13%	0,03	22%
WARMWATER SHRIMPS	0,15	12%	0,02	12%
GILTHEAD SEABREAM	0,14	12%	0,01	9%
WHITING	0,14	12%	0,01	7%
COMMON SOLE	0,12	9%	0,01	6%
OTHERS	0,51	42%	0,08	44%

## AQUACULTURE Source: EUMOFA, based on Eurostat and FAO data.

Aquaculture consists in the farming of aquatic (fresh or saltwater) organisms, such as fish, molluscs, crustaceans and aquatic plants. Aquaculture data are reported in live weight equivalent and value.

In 2020, 70% of Slovenian production occurred in freshwater and 30% in marine waters. According Eurostat 2020, the following main production methods were used:

- 60% of production in tanks in freshwater;
- 23% of production: on bottom in sea and brackish water;
- 9% of production in ponds in freshwater;
- 6% of production in cages in sea and brackish water;
- 1% of production: off bottom in sea and brackish water.

**Total production.** Values are deflated by using the GDP deflator (base=2015)

### Main commercial species farmed and % of total 2020, 1.000 euros (nominal value) and tonnes

Species	Value (1.000 euros)	% of total
TROUT	3,8	66%
CARP	0,3	5%
OTHERS	1,6	28%

Species	Volume (1.000 tonnes)	% of total
TROUT	0,9	47%
MUSSEL MYTILUS SPP.	0,4	21%
OTHERS	0,6	32%

## WHOLESALE

Wholesale is an intermediary stage in the distribution channel that buys in bulk and sells to resellers (e.g. retailers) rather than to consumers. In Slovenia, there are wholesalers but no wholesale market (source: Eurofish).

## PROCESSING

According to Eurostat-SBS, 101 persons were employed in the Slovenian fish processing industry in 2017. In 2013, the sector recorded a value added of 2,1 million euros, covering only 1% of the value added of total manufacture of food products.

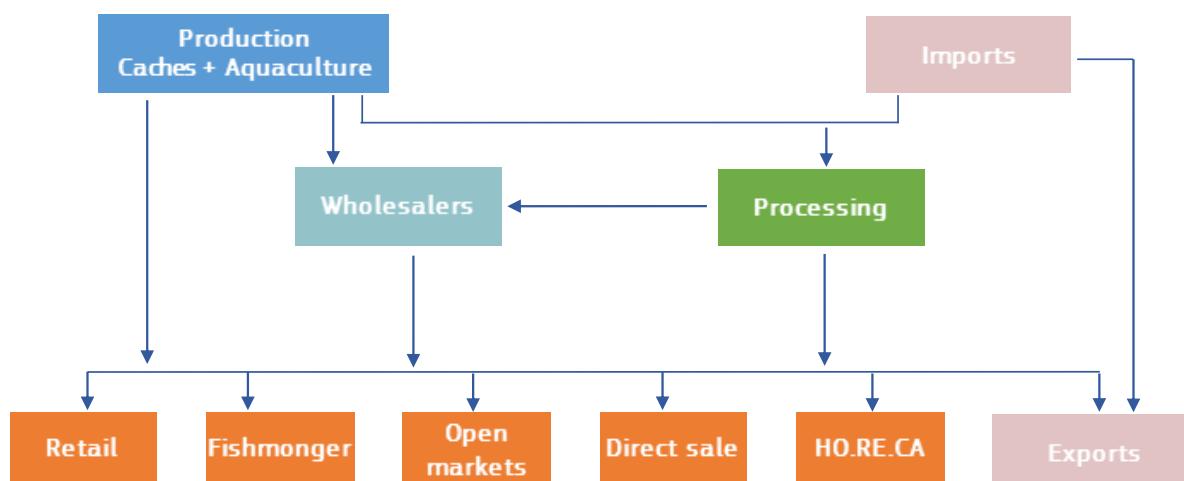

In 2013, the main product sold was “Fats and oils and their fractions of fish or marine mammals (excluding chemically modified)” (source: Eurostat-PRODCOM).

## CONSUMPTION

In 2020, apparent consumption was estimated at 11,98 kg per capita, a slight decrease compared with 2019. The most consumed species were skipjack tuna and squid (source: EUMOFA). Regular consumers, namely those who eat fishery and aquaculture products at least once a month, mainly belong to age groups 25-39 and 45-54. Young people (15-24) are less inclined to consume fish in Slovenia, as well as at EU-28 level. In this category, regular consumers cover 60% of the total, which is lower than at EU level (67%, UK included). Slovenians consume especially fresh products and canned products; loose fish (65%) is slightly less frequently consumed than at EU level (68%, UK included) (source: EUMOFA, "EU consumer habits regarding fishery and aquaculture products", 2017).

## THE COUNTRY IN EUMOFA

### LANDINGS

Volumes and values are collected from Eurostat – Fishery. They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

### AQUACULTURE

Volumes and values are collected from Eurostat – Fishery and integrated with FAO data.

They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

### FIRST SALES

No data available

### WHOLESALE

No data available

### IMPORT - EXPORT

Volumes and values are collected from Eurostat – COMEXT. Data concern trade flows of all fisheries and aquaculture products as recorded by national customs.

They are available on a monthly and yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

### PROCESSING

Data are collected from Eurostat – PRODCOM. They concern ex-farm quantities and values of fisheries and aquaculture products sold in the country after being transformed from raw material into final products.

They are available on a yearly basis and accessible through simple tables, as well as through the bulk download facility.

### CONSUMPTION

No data available
