## LANDINGS

Source: EUMOFA, based on Eurostat data

Landings comprise the initial unloading of any fisheries products from on board a fishing vessel in a given EU Member State. They include aquatic plants and species not destined for human consumption. Landings are recorded in net weight and value, and concern landings made by vessels from EU Member States, Iceland and Norway.

Landings in Slovenia only include fresh products destined for human consumption.

There are 3 fishing ports registered in the country (source: EU Master Data Register).

### Total landings

### Main commercial species landed and % of total

(2017, 1.000 euros and tonnes)

Species	Value (1.000 euros)	% of total value	Volume (1.000 tonnes)	% of total volume
GILTHEAD SEABREAM	178	20%	21	16%
COMMON SOLE	167	19%	19	15%
SQUID	95	11%	13	10%
WHITING	62	7%	12	9%
EUROPEAN SEABASS	53	6%	7	6%
OTHERS	334	37%	57	44%

## AQUACULTURE

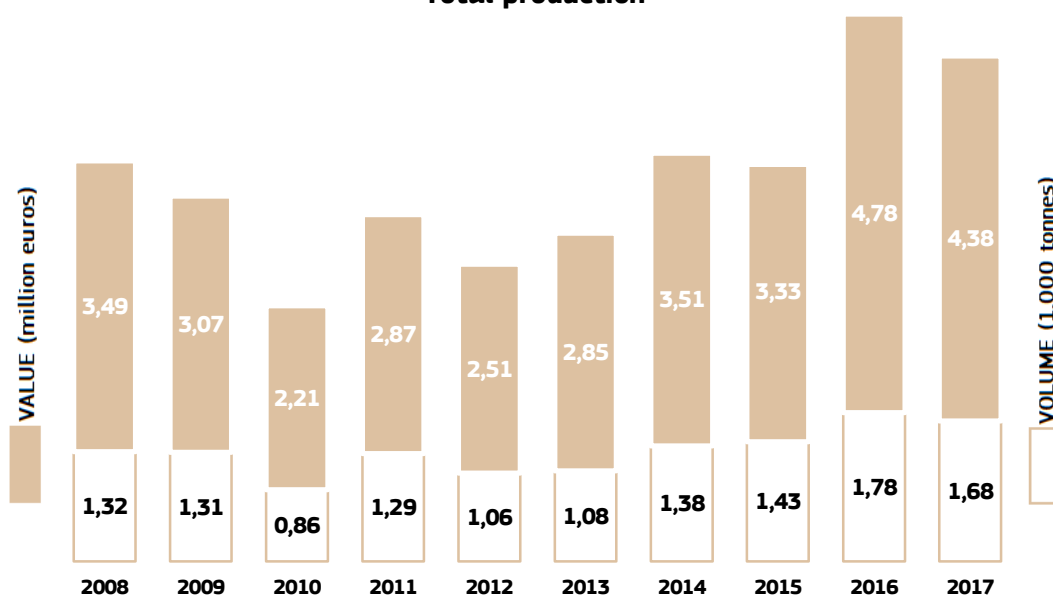

Source: EUMOFA, based on Eurostat and FAO data

Aquaculture consists in the farming of aquatic (freshwater or saltwater) organisms, such as fish, molluscs, crustaceans and aquatic plants. Aquaculture data are reported in live weight equivalent and value.

In 2017, 58% of Slovenian production occurred in freshwater and 42% in marine waters. The following main production methods were used:

- 49% of production: in tanks and raceways in freshwater;
- 42% of production: off bottom in sea and brackish water;
- 9% in ponds in freshwater.

### Total production

### Main commercial species farmed and % of total

(2017, 1.000 euros and tonnes)

TROUT	2.711	63%	748	45%	TROUT
EUROPEAN SEABASS	495	11%	641	38%	MUSSEL MYTILUS SPP.
MUSSEL MYTILUS SPP.	340	8%	123	7%	CARP
CARP	284	7%	82	5%	EUROPEAN SEABASS
OTHERS	467	11%	80	5%	OTHERS

## WHOLESALE

Wholesale is an intermediary stage in the distribution channel that buys in bulk and sells to resellers (e.g. retailers) rather than to consumers. In Slovenia, there are wholesalers but no wholesale market (source: Eurofish).

## PROCESSING

According to Eurostat-SBS, 101 persons were employed in the Slovenian fish processing industry in 2017. In 2013, the sector recorded a value added of 2,1 million euros, covering only 1% of the value added of total manufacture of food products.

In 2018, the main product sold was "Prepared or preserved tuna, skipjack and Atlantic bonito, whole or in pieces (excl. minced products and prepared meals and dishes)" (source: Eurostat-PRODCOM).

## CONSUMPTION

In 2017, apparent consumption was estimated at 11,7 kg per capita, a 2,6% increase compared with 2016. The most consumed species were skipjack tuna and squid (source: EUMOFA).

Regular consumers, namely those who eat fishery and aquaculture products at least once a month, mainly belong to age groups 25-39 and 45-54. Young people (15-24) are less inclined to consume fish in Slovenia, as well as at EU level. In this category, regular consumers cover 60% of the total, which is lower than at EU level (67%). Slovenians consume especially fresh products and canned products; loose fish (65%) is slightly less frequently consumed than at EU level (68%) (source: EUMOFA, "EU consumer habits regarding fishery and aquaculture products", 2017).

## THE COUNTRY IN EUMOFA

### LANDINGS

Volumes and values are collected from Eurostat – Fishery.

They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

### AQUACULTURE

Volumes and values are collected from Eurostat – Fishery and integrated with FAO data.

They are available on a yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

### FIRST SALES

No data available

### WHOLESALE

No data available

### IMPORT - EXPORT

Volumes and values are collected from Eurostat – COMEXT. Data concern trade flows of all fisheries and aquaculture products as recorded by national customs.

They are available on a monthly and yearly basis and accessible through simple and advanced tables, as well as through the bulk download facility.

### PROCESSING

Data are collected from Eurostat – PRODCOM. They concern ex-farm quantities and values of fisheries and aquaculture products sold in the country after being transformed from raw material into final products.

They are available on a yearly basis and accessible through simple tables, as well as through the bulk download facility.

### CONSUMPTION

No data available
